

AllerSnap™ | High Sensitivity Allergen Prevention Test

AllerSnap™ accurately monitors surface cleanliness to help ensure product quality by detecting protein residues left on a surface after cleaning. Simply swab a surface, release the reagent, incubate, and if protein residue is present, the reagent will turn purple.

Benefits:

- Results in 15-30 minutes, allowing immediate corrective action
- Easy-to-interpret semi-quantitative color results (faster change, deeper colors mean more contamination)
- Broad-range, non-specific protein detection faster than specific allergen tests
- Low carbon-footprint devices are 100% recyclable
- 18-month shelf life at room or refrigerated temperature (2 – 25 °C)

Sensitivity:

- Detects 3 µg protein after 30 minutes at 37 °C or 15 minutes at 55 °C

Color Results:

Related Products

Digital Dry Block Incubators

Digital incubators are capable of up to 105 °C and flexible for any Hygiena test device. Available in two sizes. Blocks sold separately.

AllerFlow Gluten

AllerFlow Gluten is an easy-to-use and convenient gluten surface residue test. Using Hygiena's convenient sample collection device and a ready-to-use lateral flow cassette, the kit includes all the required materials to collect a sample and run the test without any additional lab equipment.

PRO-Clean™

PRO-Clean™ is a quick and easy-to-use device for monitoring the cleanliness of surfaces and safeguarding product quality. PRO-Clean detects protein residues left on a surface after cleaning, giving results in 1-10 minutes without any required instrumentation.

SuperSnap™

SuperSnap™ is Hygiena's most sensitive ATP surface test. Designed to work with all Hygiena luminometers, SuperSnap is an all-in-one test which detects extremely low levels of ATP, enabling its use in food and beverage processing facilities as an allergen cross contamination prevention tool.
