	SOLUTION A2000						

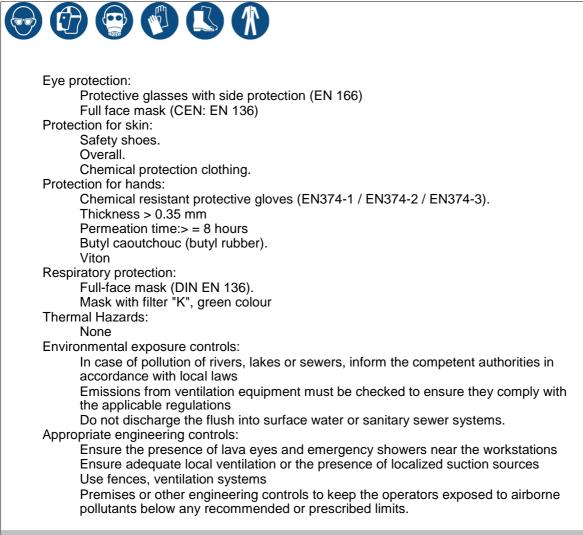

**CLEANING SOLUTION A2000** 

Page n. 2 of 11

Immediately take off all contaminated clothing.
OBTAIN IMMEDIATE MEDICAL ATTENTION.
Remove contaminated clothing immediatley and dispose off safely.
After contact with skin, wash immediately with soap and plenty of water.
In case of eyes contact:
After contact with the eyes, rinse with water with the eyelids open for a sufficient length of time,
then consult an opthalmologist immediately.
Protect uninjured eye.
In case of Ingestion:
Do NOT induce vomiting.
In case of Inhalation:
In case of inhalation, consult a doctor immediately and show him packing or
label. 4.2. Most important symptoms and effects, both acute and delayed
Burns
Serious eye injuries
Cough
Burning in the mouth, throat and stomach
4.3. Indication of any immediate medical attention and special treatment needed
In case of accident or unwellness, seek medical advice immediately (show directions for use or
safety data sheet if possible).
Treatment:
Show this Safety Data Sheet
In case of ingestion or inhalation of large quantities, immediately contact a Poison
Center In case of high levels of exposure consult a physician Treat symptomatically.
SECTION 5: Firefighting measures
5.1. Extinguishing media
Suitable extinguishing media:
Use a suitable extinguishing medium for the surrounding fire
Extinguishing media which must not be used for safety reasons: No element identified
5.2. Special hazards arising from the substance or mixture Do
5.2. Special hazards arising from the substance or mixture Do not inhale explosion and combustion gases. Burning
5.2. Special hazards arising from the substance or mixture Do not inhale explosion and combustion gases. Burning produces heavy smoke.

#### SECTION 9: Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties

Properties	Value	Method:	Notes
Appearance and colour:	Colorless liquid		
Odour:	Characteristic		
Odour threshold:	5 ppm		
pH:	12,3		
Melting point / freezing point:	-87°C		
Initial boiling point and boiling range:	27°C		

CLEANING SOLUTION A2000 Page n. 5 of 11

Flash point:	Not determined °C	 	
Evaporation rate:	Not determined	 	
Solid/gas flammability:	Not Inflammable	 	
Upper/lower flammability or explosive limits:	Not determined	 	
Vapour pressure:	659 hPa	 	
Vapour density:	Not determined	 	
Relative density:	0.892 g/cm3	 	
Solubility in water:	Soluble	 	
Solubility in oil:	No data available	 	
Partition coefficient (n- octanol/water):	Not determined	 	
Auto-ignition temperature:	Not determined	 	
Decomposition temperature:	Not determined	 	
Viscosity:	Cinematic : 1.3 mm2/s	 	
Explosive properties:	None	 	
Oxidizing properties:	None	 	

### 9.2. Other information

Properties	Value	Method:	Notes
Miscibility:	Not available		
Fat Solubility:	Not available		
Conductivity:	Not available

SECTION 10: Stability and reactivity
10.1. Reactivity
Stable under normal conditions
10.2. Chemical stability
Stable under normal conditions
10.3. Possibility of hazardous reactions
None
10.4. Conditions to avoid
Avoid exposing the product to high temperatures
Contact with metals
Keep away from naked flames, hot surfaces and ignition
sources Incompatibles materials
10.5. Incompatible materials
Acids
10.6. Hazardous decomposition products
Thermal decomposition or fire may liberate gases and vapors potentially harmful to health
Thermal decomposition of the may liberate guees and vapors potentially harman to health
SECTION 11: Tavical aginal information
SECTION 11: Toxicological information
11.1. Information on toxicological effects
Toxicological information of the product:
ammonia% - CAS: 1336-21-6
a) acute toxicity Not
classified
Based on available data, the classification criteria are not met
b) skin corrosion/irritation
a) parious ave demoge/irritation
c) serious eye damage/irritation Not classified
Based on available data, the classification criteria are not met
d) respiratory or skin sensitisation
e) germ cell mutagenicity
Not classified
Based on available data, the classification criteria are not met
f) carcinogenicity
g) reproductive toxicity
Not classified
Based on available data, the classification criteria are not met
h) STOT-single exposure
i) STOT-repeated exposure
Not classified
Based on available data, the classification criteria are not met
j) aspiration hazard
Not classified
Based on available data, the classification criteria are not met
Toxicological information of the main substances found in the product:
N.A.

Page n. 9 of 11

Provisions related to directive EU 2012/18 (Seveso III): Seveso III category according to Annex 1, part 1 Product belongs to category: E1, E2

#### 15.2. Chemical safety assessment Substances for which a Chemical Safety Assessment has been carried out: ammonia ....%

#### SECTION 16: Other information

Full text of phrases referred to in Section 3:

H314 Causes severe skin burns and eye damage.

H335 May cause respiratory irritation.

H400 Very toxic to aquatic life.

H411 Toxic to aquatic life with long lasting effects.

Hazard class and hazard category	Code	Description
Skin Corr. 1B	3.2/1B	Skin corrosion, Category 1B
STOT SE 3	3.8/3	Specific target organ toxicity - single exposure, Category 3
Aquatic Acute 1	4.1/A1	Acute aquatic hazard, category 1
Aquatic Chronic 2	4.1/C2	Chronic (long term) aquatic hazard, category 2

#### Paragraphs modified from the previous revision:

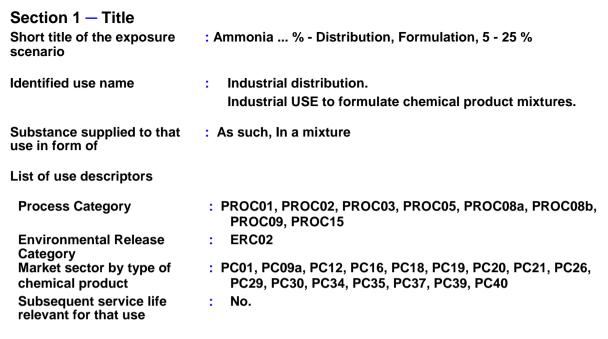

SECTION 2: Hazards identification SECTION 3: Composition/information on ingredient SECTION 8: Exposure controls/personal protection SECTION 11: Toxicological information SECTION 12: Ecological information SECTION 15: Regulatory information

Classification and procedure used to derive the classification for mixtures according to Regulation (EC) 1272/2008 [CLP]:

Classification according to Regulation (EC) Nr. 1272/2008	Classification procedure
Skin Corr. 1B, H314	Calculation method
STOT SE 3, H335	Calculation method
Aquatic Acute 1, H400	Calculation method
Aquatic Chronic 2, H411	Calculation method

#### Section 2 – Exposure controls

Contributing exposure scenar	io controlling environmental exposure for:
Product Characteristics	: In aqueous preparations
Concentration of substance in mixture or article	: 5-25%
Amounts used	: Annual site tonnage 1000000
Environmental factors not influenced by risk	: Flow rate of receiving surface water (m3/d): 20.000 Local freshwater dilution factor10
management	Local marine water dilution factor 10
Emission days	330
Release fraction to air from process (initial release prior to RMM)	ERC02: 2,5 %

Release fraction to wastewater from process (initial release prior to RMM)	ERC02: 2 %
Risk management	: Waste water treatment:
measures - Water	Treatment effectiveness 99,9 %
Conditions and measures related to municipal sewage treatment plant	: Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination. All contaminated waste water must be processed in an industrial or municipal wastewater treatment plant that incorporates both primary and secondary treatments.
Suitable waste treatment	: Biological nitrogen elimination

Contributing exposure scena	rio controlling worker exposure for:
Concentration of substance in mixture or article	: 5-25%
Physical state	: liquid
	aqueous preparations
Frequency and duration of	: Unless otherwise stated
use	Use duration (h/d): > 4
Area of use:	: Indoor, Outdoor
Ventilation control measures	<ul> <li>Contributing Scenario: PROC02, PROC03, PROC08b, PROC15 Local exhaust ventilation should be provided. Treatment effectiveness &gt; 90 %</li> </ul>
	Contributing Scenario: PROC05, PROC08a, PROC09 Local exhaust ventilation should be provided. Treatment effectiveness > 90 %
	Contributing Scenario: PROC01 No special ventilation requirements.
Conditions and measures rel	ated to personal protection, hygiene and health evaluation
Personal protection	<ul> <li>Causes severe skin burns and eye damage., Wear protective gloves/clothing and eye/face protection.</li> <li>Treatment effectiveness &gt; 90 %</li> <li>See Section 8 of the safety data sheet (personal protective equipment).</li> </ul>
Respiratory protection	: Contributing Scenario: PROC02, PROC03, PROC08b, PROC15 In case of inadequate ventilation wear respiratory protection:, Treatment effectiveness > 95 %

Contributing Scenario: PROC05, PROC08a, PROC09 < 4 hours:, In case of inadequate ventilation wear respiratory protection:, > 4 hours:, Wear appropriate respiratory protection., Treatment effectiveness > 95 %
Contributing Scenario: PROC01 No personal respiratory protective equipment normally required.

### Section 3 – Exposure estimation and reference to its source

## Section 2 - Exposure controls

1

Contributing exposure scenario controlling environmental exposure for:		
Product Characteristics	: In aqueous preparations	
Concentration of substance in mixture or article	: >25%	
Amounts used	: Annual site tonnage 25000	

Environmental factors not	: Flow rate of receiving surface water (m3/d): 20.000		
influenced by risk	Local freshwater dilution factor10		
management	Local marine water dilution factor 10		
Emission days	330		
Deleges frestion to sinfrom			
Release fraction to air from	ERC04: 95 %		
process (initial release prior	ERC05: 50 %		
to RMM)	ERC06b: 0,1 %		
	ERC07: 5 %		
Release fraction to	ERC04: 100 %		
wastewater from process	ERC05: 50 %		
(initial release prior to RMM)	ERC06b: 5 %		
	ERC07: 5 %		
Risk management	: Waste water treatment:		
measures - Water	Treatment effectiveness 99,9 %		
Conditions and measures	: Required removal efficiency for wastewater can be achieved		
related to municipal sewage	using onsite/offsite technologies, either alone or in combination.		
treatment plant	All contaminated waste water must be processed in an industrial		
	or municipal wastewater treatment plant that incorporates both		
	primary and secondary treatments.		
Suitable waste	: Biological nitrogen elimination		
treatment			

Contributing exposure scenario controlling worker exposure for:			
Concentration of substance in mixture or article	: >25%		
Physical state	: Liquid.		
	aqueous preparations		
Frequency and duration of	: Unless otherwise stated		
use	Use duration (h/d): > 4		
Area of use:	: Indoor, Outdoor		
Ventilation control measures	: Contributing Scenario: PROC02, PROC03, PROC04, PROC08b Local exhaust ventilation should be provided. Treatment effectiveness > 90 %		
	Contributing Scenario: PROC05, PROC09,		
	PROC13 Local exhaust ventilation should be		
	provided. Treatment effectiveness > 90 %		
	Contributing Scenario: PROC01		
	No special ventilation requirements.		

Conditions and measures related to personal protection, hygiene and health evaluation		
Personal protection :	Causes severe skin burns and eye damage., Wear protective gloves/clothing and eye/face protection. Treatment effectiveness > 90 % See Section 8 of the safety data sheet (personal protective equipment).	
Respiratory protection :	Contributing Scenario: PROC02, PROC03, PROC04, PROC08b In case of inadequate ventilation wear respiratory protection:, Treatment effectiveness > 95 %	
	Contributing Scenario: PROC05, PROC09, PROC13 < 4 hours:, In case of inadequate ventilation wear respiratory protection., > 4 hours:, Wear appropriate respiratory protection., Treatment effectiveness > 95 %	
	Contributing Scenario: PROC01 No personal respiratory protective equipment normally required.	

#### Section 3 – Exposure estimation and reference to its source

Website:	: Environment:, EUSES v2.1, http://ihcp.jrc.ec.europa.eu/our_activities/public- health/risk_assessment_of_Biocides/euses Workers:, ECETOC TRA v2.0 Worker, http://www.ecetoc.org/
Exposure estimation and r	eference to its source - Environment:
Exposure assessment (environment):	: Used EUSES model.
Èxposure estímation	: See Section 8 in SDS, PNEC. Predicted exposures are not expected to exceed the PNEC when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.

Exposure estimation and reference to its source - Workers:			
Exposure assessment (human):	: Used ECETOC TRA model.		
Exposure estimation	: See Section 8 in SDS, DNEL. Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.		

## Section 4 – Guidance to Downstream User to evaluate if he works inside the boundaries set by the ES

Environment

	not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures., For scaling, see, EUSES v2.1
Health	: Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures., For scaling, see, ECETOC TRA.

Abbreviations and acronyms		
Process Category :	PROC01 - Use in closed process, no likelihood of exposure PROC02 - Use in closed, continuous process with occasional controlled exposure PROC03 - Use in closed batch process (synthesis or formulation) PROC04 - Use in batch and other process (synthesis) where opportunity for exposure arises PROC05 - Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact) PROC08b - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities PROC09 - Transfer of substance or preparation into small containers (dedicated filling line, including weighing) PROC13 - Treatment of articles by dipping and pouring	
Environmental : Release Category	ERC04 - Industrial use of processing aids in processes and products, not becoming part of articles ERC05 - Industrial use resulting in inclusion into or onto a matrix ERC06b - Industrial use of reactive processing aids ERC07 - Industrial use of substances in closed systems	
Market sector by type of chemical product	<ul> <li>PC01 - Adhesives, sealants</li> <li>PC09a - Coatings and paints, thinners, paint removers</li> <li>PC14 - Metal surface treatment products, including galvanic and electroplating products</li> <li>PC15 - Non-metal surface treatment products</li> <li>PC16 - Heat transfer fluids</li> <li>PC20 - Products such as ph-regulators, flocculants, precipitants, neutralization agents</li> <li>PC26 - Paper and board dye, finishing and impregnation products: including bleaches and other processing aids</li> <li>PC30 - Photo-chemicals</li> <li>PC34 - Textile dyes, finishing and impregnating products; including bleaches and other processing aids</li> <li>PC35 - Washing and cleaning products (including solvent based products)</li> <li>PC37 - Water treatment chemicals</li> <li>PC39 - Cosmetics, personal care products</li> </ul>	

PC40 - Extraction agents
J04 - Manufacture of food products SU05 - Manufacture of textiles, leather, fur SU06a - Manufacture of wood and wood products SU06b - Manufacture of pulp, paper and paper products SU08 - Manufacture of bulk, large scale chemicals (including petroleum products) SU09 - Manufacture of fine chemicals SU11 - Manufacture of rubber products SU12 - Manufacture of plastics products, including compounding and conversion SU13 - Manufacture of other non-metallic mineral products, e.g. plasters, cement SU15 - Manufacture of fabricated metal products, except machinery and equipment SU16 - Manufacture of computer, electronic and optical products, electrical equipment SU23 - Electricity, steam, gas water supply and sewage treatment SU 0: Other: NACE B - Mining and quarrying SU 0: Other: NACE C - Manufacture of other general- purpose machinery

Section 1 — Title Short title of the exposure scenario	: Ammonia % - Industrial, Use as an intermediate, > 25 %
Identified use name	: Industrial USE as chemical intermediate.
Substance supplied to that use in form of	: As such, In a mixture
List of use descriptors	
Process Category	: PROC01, PROC02, PROC03, PROC04, PROC05, PROC08b, PROC09, PROC15
Environmental Release Category	: ERC06a
Market sector by type of chemical product	: PC19
Sector of end use	: SU01, SU05, SU08, SU09, SU12, SU24, SU 0: Other: NACE C21
Subsequent service life relevant for that use	: No.
Number of the ES	. 00000006485-1/2017-06-13

Number of the ES	÷.,	000000006485-1/2017-06-13

### Section 2 – Exposure controls

Contributing exposure scenario controlling environmental exposure for:		
Product Characteristics	: In aqueous preparations	
Concentration of substance in mixture or article	: >25%	
Amounts used Environmental factors not influenced by risk management	<ul> <li>Annual site tonnage 800000</li> <li>Flow rate of receiving surface water (m3/d): 20.000</li> <li>Local freshwater dilution factor10</li> <li>Local marine water dilution factor 10</li> </ul>	
Emission days	330	
Release fraction to air from process (initial release prior	ERC06a: 5 %	

to RMM)	
Release fraction to wastewater from process (initial release prior to RMM)	ERC06a: 2 %
Risk management	: Waste water treatment:
measures - Water	Treatment effectiveness 99,9 %
Conditions and measures related to municipal sewage treatment plant	: Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination. All contaminated waste water must be processed in an industrial or municipal wastewater treatment plant that incorporates both primary and secondary treatments.
Suitable waste treatment	: Biological nitrogen elimination

Contributing exposure scena	rio	controlling worker exposure for:
Concentration of substance in mixture or article	:	>25%
Physical state	:	liquid
		aqueous preparations
Frequency and duration of	:	Unless otherwise stated
use		Use duration (h/d): > 4
Area of use:	:	Indoor, Outdoor
Ventilation control measures	:	Contributing Scenario: PROC02, PROC03, PROC04, PROC08b, PROC15
		Local exhaust ventilation should be provided.
		Treatment effectiveness > 90 %
		Contributing Scenario: PROC05, PROC09
		Local exhaust ventilation should be provided. Treatment effectiveness > 90 %
		Contributing Scenario: PROC01
		No special ventilation requirements.
Conditions and measures rel	atec	I to personal protection, hygiene and health evaluation
Personal protection	:	Causes severe skin burns and eye damage., Wear protective gloves/clothing and eye/face protection. Treatment effectiveness > 90 % See Section 8 of the safety data sheet (personal protective
		equipment).
Respiratory protection	:	Contributing Scenario: PROC02, PROC03, PROC04, PROC08b,

PROC15 In case of inadequate ventilation wear respiratory protection:, Treatment effectiveness > 95 %
Contributing Scenario: PROC05, PROC09 < 4 hours:, In case of inadequate ventilation wear respiratory protection., > 4 hours:, Wear appropriate respiratory protection., Treatment effectiveness > 95 %
Contributing Scenario: PROC01 No personal respiratory protective equipment normally required.

#### Section 3 – Exposure estimation and reference to its source

Website:	:	Environment:, EUSES v2.1, http://ihcp.jrc.ec.europa.eu/our_activities/public- health/risk_assessment_of_Biocides/euses Workers:, ECETOC TRA v2.0 Worker, http://www.ecetoc.org/

Exposure estimation and reference to its source - Environment:	
Exposure assessment (environment):	: Used EUSES model.
Èxposure estimation	: See Section 8 in SDS, PNEC. Predicted exposures are not expected to exceed the PNEC when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.

Exposure estimation and r	eference to its source - Workers:
Exposure assessment (human):	: Used ECETOC TRA model.
Exposure estimation	: See Section 8 in SDS, DNEL. Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.

# Section 4 – Guidance to Downstream User to evaluate if he works inside the boundaries set by the ES

Environment	: Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures., For scaling, see, EUSES v2.1
Health	: Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures., For scaling, see, ECETOC TRA.

Process Category	· PPOCO1 - Use in closed process no likelihood of experience
Process Category	<ul> <li>PROC01 - Use in closed process, no likelihood of exposure PROC02 - Use in closed, continuous process with occasional controlled exposure PROC03 - Use in closed batch process (synthesis or formulation) PROC04 - Use in batch and other process (synthesis) where opportunity for exposure arises PROC05 - Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact) PROC08b - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities PROC09 - Transfer of substance or preparation into small containers (dedicated filling line, including weighing)</li> </ul>
	PROC15 - Use a laboratory reagent
Environmental Release	: ERC06a - Industrial use resulting in manufacture of another
Category	substance (use of intermediates)
Market sector by type of chemical product	: PC19 - Intermediate
Sector of end use	: SU01 - Agriculture, forestry, fishery
	SU05 - Manufacture of textiles, leather, fur SU08 - Manufacture of bulk, large scale chemicals (including petroleum products)
	SU09 - Manufacture of fine chemicals
	SU12 - Manufacture of plastics products, including compounding and conversion
	SU24 - Scientific research and development
	SU 0: Other: NACE C21 - Manufacture of basic
	pharmaceutical products and pharmaceutical preparations

Section 1 — Title Short title of the exposure scenario	: Ammonia % - Professional, Industrial, > 25 %
Identified use name	<ul> <li>Professional formulation of mixtures. Professional USE as chemical/process nutrient. Professional USE as reactive agent/processing aid and for general chemical applications. Professional USE as a laboratory/research chemical. Professional USE as heat transfer fluid. Professional USE for surface/article treatment. Professional USE as part of specialist chemicals/other products. Professional USE as photochemical.</li> </ul>
Substance supplied to that use in form of	: As such, In a mixture

Process Category Environmental Release	<ul> <li>PROC01, PROC02, PROC03, PROC04, PROC05, PROC08a, PROC08b, PROC09, PROC13, PROC15, PROC20</li> <li>ERC08b, ERC08e, ERC09a, ERC09b</li> </ul>
Category Market sector by type of chemical product Sector of end use	<ul> <li>PC09a, PC12, PC14, PC15, PC16, PC19, PC20, PC21, PC29, PC30, PC34, PC35, PC37, PC40</li> <li>SU01, SU04, SU05, SU06a, SU06b, SU09, SU10, SU11, SU12, SU15, SU16, SU17, SU23, SU24, SU 0: Other: NACE B, SU 0: Other: NACE C, SU 0: Other: NACE C28.2</li> </ul>
Subsequent service life relevant for that use	: No.

### Section 2 – Exposure controls

Number of the ES

Contributing exposure scenario controlling environmental exposure for: All Contains substances occurring naturally in surface waters., No exposure assessment presented for the environment., Not applicable for wide dispersive uses

00000006486-1/2017-06-13

Contributing exposure scenario controlling worker exposure for:

2

Concentration of substance in mixture or article	: >25%
Physical state	: liquid
	aqueous preparations
Frequency and duration of	: Unless otherwise stated
use	Use duration (h/d): > 4
Area of use:	: Indoor, Outdoor
Ventilation control measures	: Contributing Scenario: PROC02, PROC03, PROC04, PROC08b, PROC15, PROC20
ineasures	Local exhaust ventilation should be provided.
	Treatment effectiveness > 90 %
	Contributing Scenario: PROC05, PROC08a, PROC09, PROC13
	Local exhaust ventilation should be provided. Treatment effectiveness > 90 %
	Contributing Scenario: PROC01 No special ventilation requirements.
Conditions and measures rel	ated to personal protection, hygiene and health evaluation
Personal protection	: Causes severe skin burns and eye damage., Wear protective
	gloves/clothing and eye/face protection. Treatment effectiveness > 90 %
	See Section 8 of the safety data sheet (personal protective
	equipment).
Respiratory protection	: Contributing Scenario: PROC02, PROC03, PROC04, PROC08b,
	PROC15, PROC20 In case of inadequate ventilation wear respiratory
	protection:, Treatment effectiveness > 95 %
	Contributing Scenario: PROC05, PROC08a, PROC09,
	PROC13 < 4 hours:, In case of inadequate ventilation wear respiratory protection., > 4 hours:, Wear appropriate
	respiratory protection., > 4 nours:, wear appropriate respiratory protection., Treatment effectiveness > 95 %
	Contributing Scenario: PROC01
	No personal respiratory protective equipment normally required.

#### Section 3 – Exposure estimation and reference to its source

Website:

: Workers:, ECETOC TRA v2.0 Worker, http://www.ecetoc.org/

Exposure assessment (human):	: Used ECETOC TRA model.
Exposure estimation	: See Section 8 in SDS, DNEL. Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.

Section 4 – Guidance to Downstream User to evaluate if he works inside the boundaries set by the ES  $% \left( {{{\rm{S}}} \right) = 0} \right)$ 

Environment	: Not applicable.
Health	: Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures., For scaling, see, ECETOC TRA.

Abbreviations and a	-
Process Category	<ul> <li>PROC01 - Use in closed process, no likelihood of exposure PROC02 - Use in closed, continuous process with occasional controlled exposure PROC03 - Use in closed batch process (synthesis or formulation) PROC04 - Use in batch and other process (synthesis) where opportunity for exposure arises PROC05 - Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact) PROC08a - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non- dedicated facilities PROC08b - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities PROC09 - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities PROC09 - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities PROC09 - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities PROC09 - Transfer of substance or preparation into small containers (dedicated filling line, including weighing) PROC13 - Treatment of articles by dipping and pouring PROC15 - Use a laboratory reagent PROC20 - Heat and pressure transfer fluids in dispersive use but closed systems</li> </ul>
