

SevenDirect SD50 pH/Ion Meter

Straight to the Point

Diverse Applications

Measuring the concentration of ions beyond H⁺: unlock the full potential of the SD50 meter across various applications, from fluoride determination in dental products to calcium in ketchup. Easily switch back and forth with SevenDirect™ methods.

Verification for Accuracy

Confirm the accuracy of your calibration: automated verification is a simple procedure to check the performance of your measurement system with a known standard and works for both, pH and ISE measurement.

Precise Sensor Position

Simplified handling avoids spilling of sample: the perfectly vertical movement of the EasyPlace™ electrode arm prevents sensor damage and ensures precise positioning, also when using multiple sensors.

Stirring for Reliable Results

Homogenized samples for more accurate results: program the EasyMix™ magnetic stirrer for the desired behaviour as part of the measurement method, including stirring and waiting periods.
